PROFESSIONAL SUMMARY

Software Engineer with 3+ years of experience in cloud architecture, DevOps, and full-stack development. Builder of Delt, a custom Platform-as-a-Service (PaaS) for Laravel, demonstrating expertise in Kubernetes, infrastructure automation, and developer tooling. Proven track record architecting identity and access management systems for government-scale deployments and building modular ERP/POS solutions for commercial enterprises. Combines engineering precision with strategic business thinking to deliver production-ready systems.

EXPERIENCE

Lead Engineer and Product Owner

Mar 2026 – Present

Delt — Zero-Config Laravel PaaS

Remote

- Architected a scalable, zero-config PaaS for Laravel using Kubernetes, automating database provisioning, object storage, SSL certificate management, and CI/CD pipelines.
- Engineered near-zero auto-scaling system integrated with Prometheus monitoring, reducing operational overhead for client deployments.
- Implemented multi-tenant isolation via Kubernetes namespaces, ensuring secure separation between customer applications.
- Built developer-focused deployment experience enabling git-push-to-live in under 3 minutes.

Full-Stack Software Engineer

Feb 2026 – Present

Hurevo — IT Consulting and ERP Solutions

South Jakarta

- Led a technology implementation firm, directing architecture of modular business ecosystems for SMBs.
- Engineered scalable ERP and POS solutions using Laravel, React, and Tailwind CSS.
- Developed integrated e-commerce and client ticketing platform with Lemon Squeezy as Merchant of Record for global USD payment processing.
- Applied interdisciplinary strategies combining software engineering with business process optimization.

Fullstack and Ops Developer

Apr 2024 – Present

vOffice Indonesia — Facilities & Business Services

Jakarta

- Built full-stack solutions to streamline corporate operations, system integration, and backend optimization.
- Architected centralized data systems and Single Sign-On (SSO) infrastructure across 25+ microservices using Keycloak.
- Developed robust internal business applications bridging complex technical requirements with daily business management processes.

Backend Developer

May 2023 – May 2024

Torche Indonesia

Bandung

- Engineered secure SSO infrastructure using Keycloak for Indonesian government systems, handling sensitive citizen data.
- Developed responsive web interfaces and scalable account management applications with React, TypeScript, and Laravel.
- Built external-facing web profiles integrated with government authentication systems.

Backend Developer

Nov 2022 – Sep 2023

Setia Inovasi Digital

Bogor

- Contributed to design and development of scalable microservices architectures using PHP Laravel and Quarkus Java.
- Supported backend infrastructure modernization for distributed, high-performance web systems.

KEY PROJECTS

Delt

Platform-as-a-Service

Mar 2026 – Present

Zero-config cloud deployment platform for Laravel applications. Kubernetes-native with multi-tenant isolation, automated SSL, and Prometheus monitoring. delt.cognerest.com

SixEight Design Studio	<i>E-commerce & Ticketing Platform</i>	Feb 2026 – Present
Full-stack client ticketing and e-commerce platform using Laravel, React (InertiaJS), and Tailwind CSS. Integrated Lemon Squeezy as Merchant of Record for automated global USD commission workflows.		
Myborn	<i>Marketplace Application</i>	Nov 2022 – Jul 2023
Multi-sided marketplace platform for shopping, selling, and food delivery. Available on Google Play		

TECHNICAL SKILLS

- Languages:** PHP, TypeScript, JavaScript, Go, Java, SQL, Bash
- Frameworks & Runtimes:** Laravel, React, InertiaJS, Tailwind CSS, Quarkus
- Cloud & Infrastructure:** Docker, Kubernetes, AWS, GCP, Terraform, Linux, Serverless (Lambda/Bref)
- DevOps & Monitoring:** Prometheus, Grafana, CI/CD (GitHub Actions), Nginx
- Security & Identity:** Keycloak, SSO, OAuth 2.0, SSL/TLS, JWT
- Other:** AI/LLM Integration, Microservices, REST API Design, ERP/POS Systems, Git

EDUCATION

Indonesia Open University	Sep 2025 – Present
Bachelor of Management — Business Management	<i>Tangerang Selatan, Indonesia</i>
SMK Negeri 1 Rongga	2020 – 2023
Software Engineering (Vocational High School)	<i>Bandung, Indonesia</i>
• Participant, LKS Jawa Barat 2022 — Web Technologies (Java West Province Competition)	

CERTIFICATIONS

- **SQL (Basic)** — HackerRank, 2023
- **Dasar-Dasar DevOps** — Dicoding Indonesia, 2022
- **LKS Jawa Barat 2022: Web Technologies** — Dinas Pendidikan Provinsi Jawa Barat

ADDITIONAL INFORMATION

- **Languages:** English (Professional working), Indonesian (Native)
- **Work Arrangement:** Available for 100% remote; open to global B2B contract or employment
- **Time Zones:** Flexible with asynchronous workflows; experienced in US/EU timezone overlap
- **Interests:** Interdisciplinary problem-solving, cloud infrastructure, platform engineering, AI systems
